

LIST OF BASIC NUCLEAR INSTALLATIONS AS AT 31.12.2008

To regulate all civil nuclear activities and installations in France, ASN has set up a regional organisation based on 11 divisions based in Bordeaux, Caen, Châlons-en-Champagne, Dijon, Douai, Lyon, Marseille, Nantes, Orleans, Paris and Strasbourg. This organisation enables ASN to carry out its duties nationwide and in the overseas *départements*¹ and territories.

The Paris division is also responsible for activities in Martinique, Guadeloupe, French Guyana, Reunion, Mayotte and Saint-Pierre et Miquelon. The Caen and Orleans divisions are responsible for BNI regulation in the Brittany and Ile de France regions respectively.

1. Administrative region headed by a *Préfet*.

LIST OF BASIC NUCLEAR INSTALLATIONS AS AT 31.12.2008

A basic nuclear installation (BNI) is one that, by its very nature or owing to the quantity or activity of the radioactive materials it contains, is subject to specific regulation arrangements as defined by the TSN Act of 13 June 2006. These installations must be authorised by decree issued following a public inquiry and an ASN opinion. Their design, construction, operation and decommissioning are all regulated.

The following are considered to be BNIs:

1. nuclear reactors;
2. large installations for the preparation, enrichment, fabrication, treatment or storage of nuclear fuels or the treatment, storage or disposal of radioactive waste;
3. large installations containing radioactive or fissile materials;
4. large particle accelerators.

Except for nuclear reactors, which are all BNIs, a decree (see decree 2007-830 of 11 May 2007 concerning the list of basic nuclear installations) sets thresholds for each category determining the point at which they become subject to the BNI system.

For technical or legal reasons, the concept of a basic nuclear installation can reflect a number of different physical situations: for example in a nuclear power plant, each reactor can be considered a separate BNI, or a given BNI can in fact consist of two reactors. Similarly, a fuel cycle plant or a CEA centre can comprise several BNIs. This legal arrangement in no way alters the regulation conditions.

The following are subject to the BNI system:

- installations under construction, provided that they are the subject of a creation authorisation decree;
- installations in operation;
- installations shut down or undergoing decommissioning, until they are delicensed by ASN.

As at 31/12/2008, there were 123 basic nuclear installations (legal entities).

The declared BNIs are those which existed prior to the publication of decree 63-1228 of 11 December 1963 concerning nuclear installations and for which neither said decree nor the TSN Act (Articles 33 and 62) stipulates authorisation rather than declaration.

The missing BNI numbers correspond to facilities which were included in previous editions of the list but which are no longer basic nuclear installations or which have been authorised as new basic nuclear installations.
